

# Town of Hudson, NH – Engineering Department

---

## Hydrant Fire Service Flow Test

Once the Engineering Dept. has received the **Application and Fee** listed below (for Town or private hydrant), we will notify our water operator, who will then contact you to schedule the flow test. Testing should be performed after hours, around 8:00 P.M. or later.

The Hudson Water Utility operator generally performs the flow test, however, if the applicant chooses to perform the test themselves, they are responsible for providing all equipment and personnel necessary. Results of the flow test will be provided to the Hudson Water Utility through the Hudson Engineering Department. The flow test must be monitored by the Hudson Water Utility authorized agent (typically our utility operator staff).

**\*\* Testing is usually scheduled out 3-5 business days.**

### Application Fees:

<b>One Hydrant Flow Test</b>	<b>\$485.00</b>	<b>PAID</b> _____	<b>Check #</b> _____
