Applications

Wetland Conservation District:

The applicant is required to take steps to prevent any intrusion into wetlands areas or the surrounding 50-foot buffer. This includes any equipment used in preparation or construction. If such intrusion is likely, the applicant must request a Conditional Use Permit from the Planning Board. If the applicant is not sure whether wetlands are present, they may request an opinion from the Town, or employ a certified wetland expert. If the building plan requires a Conditional Use Permit, the plan must show the locations of the wetland, the buffer and all structures. The wetlands must be staked by a certified wetlands expert. Please be advised it is not always obvious that wetlands are present. In addition to the evidence of water, specific vegetation may be evidence of a wetland. Failure to comply with this requirement will result in a stop work order and may lead to monetary fines being imposed.
