Additional information Regarding the Proposed Roadside Cleanup in April 20<sup>th</sup>.

Communications between Chief Dionne, Jay Twardosky, and myself that occurred after the Proposal was submitted midday on Thursday, February 29<sup>th</sup> resulted in additional safety measures being adopted.

The DPW will be deploying an Electronic Sign at each end of Musquash Road about a week prior to the proposed Roadside Cleanup. The message displayed will first caution drivers about the upcoming Roadside Cleanup on April 20<sup>th</sup>. Then due to the sophistication of the Electronic Signs software the message will change for April 20<sup>th</sup>.

The DPW will be deploying approximately 10 “Litter Crew at Work” signs along the sides of the road prior to April 20<sup>th</sup>. There are some Road Work signs that might be helpful to place as needed. That morning those signs will be stood up by members of the Sustainability Committee.

The HPD will be committing a Patrol Officer/Cruiser to patrol the whole of Musquash on April 20 and in particular to help assure the safety of the volunteers.

There will be two groups, one starting at each end of Musquash....but both groups will work ONE side of Musquash. For example, the group starting out at the Burns Hill Fire Station could start on what would be their right side of Musquash. The second group starting out from the far end of the road would start on what would be their left side of the road. By keeping all volunteers on one side of the road it will be easier for the Patrol Officer and safer for the volunteers. A line of communication will be established between each group and the patrol officer...this will be especially important when the two groups meet and need to crossover to complete the other side of the road.
